A ROSE FOR EVERY HOME
A BUSH FOR EVERY GARDEN

THE AMERICAN ROSE SOCIETY was organized in 1899 "to increase general interest in the cultivation and to improve the standard of excellence of **THE ROSE FOR ALL THE PEOPLE.**" It holds several annual national exhibitions, at which large prizes are awarded for the best Roses.

It encourages local exhibitions, and has affiliated with it many Rose societies. It supervises five Rose test-gardens—in Hartford, Ithaca, Minneapolis, Washington, and Portland. All new Roses of value are registered with it, and its Medals are highly prized as an evidence of especial merit. Its membership has increased nearly seven hundred per cent in the past year, and now includes interested amateurs all over America.

Most of all, it issues only for its members **THE AMERICAN ROSE ANNUAL**, the authoritative record of American Rose progress, which is needed by every Rose-lover in America. Membership at \$2 per annum brings this fine book and other publications of the Society, with tickets to its exhibitions.

Yours truly,

New Salvia, America

SCHIZANTHUS—Pink Beauty

The flowers of this new variety are of an exquisite shade of rose pink, a pure self without any marking or shading whatever. A distinct advance upon anything of this color yet known in Schizanthus. VERBENA—"Helen Willmott"

After many years of constant selection, seed of this Verbena has at last been saved in sufficient quantity to be offered for sale. A large percentage of the flowers are of the true "Helen Willmott" color, a pretty bright salmon rose, with white eye.

Per trade pkt., 50c.

Michell's New Spencer or Orchid Flowered Sweet Peas

5

Henrietta A new variety introduced this season for the first time, which has been secured after many years of selection. The color of this charming variety is a beautiful, clear light pink on a cream ground. The great attractive beauty of the flower, however, is its enormous size and frilled appearance, owing to the extent of the duplexing. For dainty table decorations, corsage bouquets or exhibition it will be hard to beat "Henrietta."

Per pkt., 20c.; 50c. per 3 pkts.; per oz., \$1.50.

Scintillator This is another variety offered this season for the first time; the ground color is cream, very daintily striped and flaked orange rose pink. The color is a little deeper on the standard than on the wings, and the keel also is lightly striped. In sunlight and under artificial light the effect is beautiful. The flowers are of great size, the standard bold, expands well and is prettily waved.

Per pkt., 20c.; 50c. per 3 pkts.; per oz., \$1.50.

Fiery Cross This new variety has all the appearance of live fire, the color being a scorching fire-red, or scarlet, without any shading, and which scintillates and glitters in bright sunlight, thus adding a glowing fire-like sheen which radiates over the flower. It does not scorch or burn in the sunshine. The beautifully waved and fluted flowers are borne freely in threes and fours, well placed on long, stout stems.

Per pkt., 10c.; \$1.00 per oz.

Illuminator The most charming color or, rather, combination of colors, yet seen in Sweet Peas, and very difficult to describe. The blooms, which are carried on long, stout stems, have a ground color of a warm salmon orange overlaid with rich bright cerise pink. The flowers are of great substance; standard bold, expanded and attractively waved.

Per oz., 30c.; \$1.00 per ¼ lb.; per lb., \$3.25.

King White A "perfect" white Spencer Sweet Pea, and superior in form, size and substance to all others of this color; flowers are of good substance, standards of immense size, bold expanded form and exquisitely waved. An extremely vigorous grower; very floriferous, and gives a large proportion of four-flowered sprays.

Per oz., 25c.; 75c. per ¼ lb.; per lb., \$2.75.

Wedgwood This new variety is appropriately named, as its color throughout is a unique shade of Wedgwood blue. The flowers, which are produced in great profusion, are borne mostly in "fours," well placed on long, stout stems. Of finest Spencer form; the standard and wings are well waved.

Per oz., 30c.; \$1.00 per ¼ lb.; per lb., \$3.00.

Early Flowering Long Season Spencer SWEET PEAS

The following varieties were grown by one of the most prominent California growers. One of their chief characteristics is their long season period of blooming, frequently remaining in bloom for four months.

Early Meadow Lark. A rich deep cream or primrose color similar to the beautiful late flowering variety "Dobbie's Cream." Many of the flowers are duplexed or double, are well waved, and borne in threes and fours on strong vines. Per pkt., 25c.; 65c. per 3 pkts.

Early Liberty. A rich, deep sunproof crimson, similar in color to the late flowering variety "King Edward Spencer." The flowers are large, well waved and borne in threes and fours. Per pkt., 25c.; 65c. per 3 pkts.

Early Songster. In this new variety we have a most excellent and attractive lavender, having less of the mauve than found in the "Asta Ohn." The flowers are very large and nicely waved. Per pkt., 25c.; 65c. per 3 pkts.

Early Warbler. Those who have seen this variety consider it a gem for the florist. The color is rich mauve purple, the flowers are extra large and beautiful in form. Per pkt., 25c.; 65c. per 3 pkts.; per ¼ oz., \$1.75; \$6.00 per oz.

Early Sunset. In this variety we have a pastel shade of great beauty. The color is rich mauve pink on white ground. Flowers are large and nicely waved. Per pkt., 25c.; 65c. per 3 pkts.; per ¼ oz., \$1.75; \$6.00 per oz.

Early Heather Bell. One of the most popular shades for the florists. The flowers are large, borne in threes and fours on long, stout stems and are of beautiful bold Spencer form. The color is a rich mauve, but after standing in water the color becomes a beautiful mauve lavender. Per oz., \$1.50; \$4.00 per ¼ lb.; per lb., \$14.00.

New Spencer Sweet Peas

Early Spring Maid. A very handsome variety. The color is a light pink on a cream ground; it is a most effective flower, and like our other Early Flowering Spencers, it carries a wealth of bloom borne in threes and fours on long stems. Per oz., \$1.50; \$4.00 per ¼ lb.; per lb., \$14.00.

Early Song Bird. An excellent variety of fine form; color pale pink on white ground. The placement of the flowers is excellent for packing and the flowers are borne on long stems in threes and fours. Per oz., \$1.50; \$4.00 per ¼ lb.; per lb., \$14.00.

Early Melody. This is a deeper shade of pink than "Early Song Bird" on white ground. The effect when bunched is most pleasing. It is very floriferous, the flowers are borne on long stems, and mostly four large, well-waved blossoms to each stem. Per oz., \$1.50; \$4.00 per ¼ lb.; per lb., \$14.00.

New Winter Flowering Sweet Pea YARRAWA (Spencer Type)

Flowers exquisitely waved, of extra large size, many of them being duplex or double. Color, a pleasing shade of bright rose pink, with lighter wings. Per oz., 75c.; \$2.50 per ¼ lb.; per lb., \$8.00.

For General List of Spencer or Orchid Sweet Peas, see page 22.

PAOLI, PA.

Gentlemen:—The Winter Flowering Sweet Peas obtained from you were wonderfully successful, blooming very early and producing immense quantities of flowers.

L. M. S. R.

Yours truly,

MICHELL'S "DISTINCTIVE" STOCKS

Stocks are invaluable and are one of the most profitable flowers to raise, provided you sow the right strains. For years we have made a specialty of supplying "distinctive" strains which are easily distinguished by their *superior quality, strong germination, and a remarkable small percentage of single flowers.*

MICHELL'S FLOWER MARKET STOCK

A branching stock of remarkable vigor of growth and size of bloom; produces its flowers evenly distributed over the stem and very early. A single plant will produce from 10 to 15 separate flower branches equally perfect. The type is of *Cut-and-Come-Again*, but much superior to what is usually known by that name.

Michell's Vegetable Seed Specialties

VERY IMPORTANT

"Please Read"

SPECIAL NOTICE

Not in a time that anyone can recall have conditions in the Seed Trade been as they are to-day. The Season 1917 closed with practically no supplies of Vegetable Seeds left over. During that year the growers who produced Seeds for us planted a much larger acreage than ever before; everyone connected in any way with agricultural pursuits put forth extra efforts to have bumper crops, but only to be disappointed in many instances.

Unfavorable weather at planting time followed by either too much rain or not enough, coupled with labor scarcity has finally resulted in the shortest crop of Vegetable Seeds in almost every item produced in the United States.

Added to this already serious condition, the Seed producing centres of Europe are not able to make their usual deliveries to us, on account of restricted acreage planted (due to labor shortage) and on account of the European Governments' system of conserving for home needs much and in most cases all of the Seed harvest.

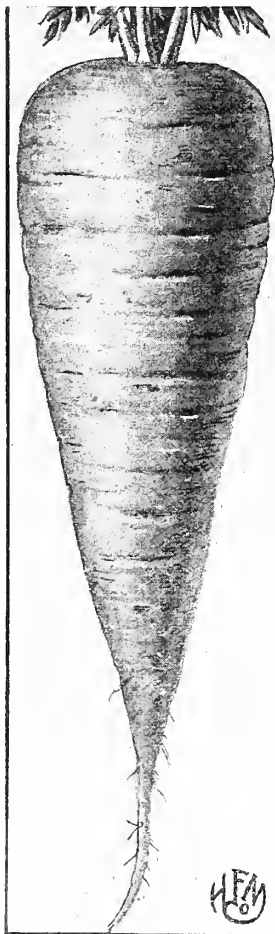

We regret this condition, but it is beyond our control, and for this reason all prices on Vegetable Seeds are offered subject to change without notice. (ORDER EARLY.)

H. F. M. CO.

We strongly urge upon our customers who have not given these varieties of vegetables on pages 26 to 28, inclusive a trial, to do so.

BEET

Michell's Ideal. This variety is the result of 11 years of hard and careful work by an expert vegetable grower in Bucks County. It is a cross between Detroit and Eclipse, combining the excellent qualities of both, but is much better than either. It is perfect, firm, of turnip shape; for tenderness, rich color and uniformity it is remarkable. It is named Ideal, because, after the great length of time spent to bring it to its present state, the originator felt that he reached the ideal he was seeking in the beet line. It is primarily intended for garden culture as an early summer variety, but adapts itself also as an autumn and winter beet. 20c. per oz.; per ¼ lb., 70c.; \$2.50 per lb.

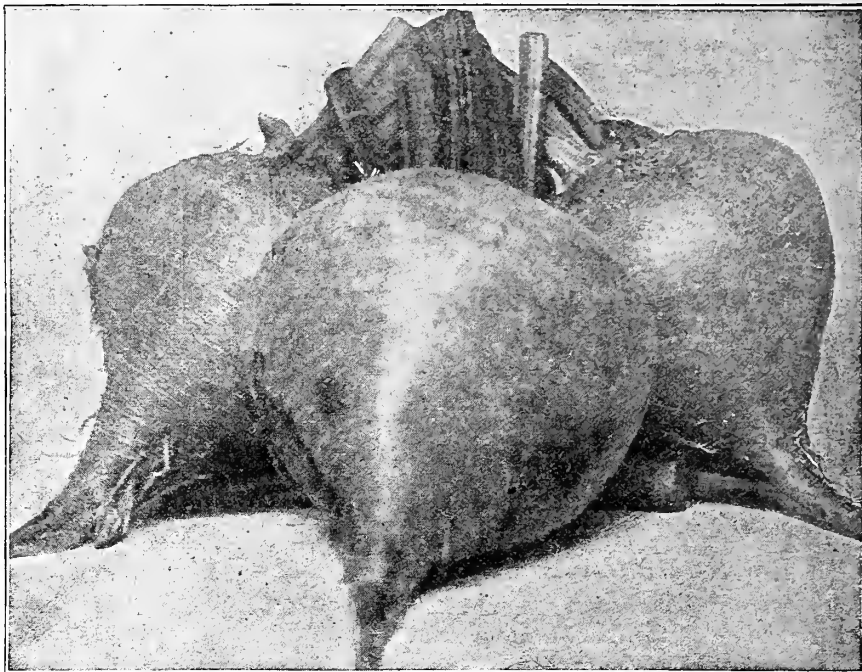

Michell's "Winter Keeper."

This grand new beet is almost globe shaped, tapering slightly toward the root. The handsome dark blood red flesh

is tender regardless of size. It is a late summer cropper, or for use during winter and spring, until new beets are on the market again. The top growth is green, the color remaining in the root. Any market gardener who wants his customers' return for their future supply of beets will do well to have this one. The cooking qualities and delicious taste may be called unsurpassed. 20c. per oz.; per ¼ lb., 60c.; \$2.00 per lb.

CARROT

Orange Beauty. A splendid point rooted winter variety of a beautiful orange yellow shape; it is very sweet and tender and an ideal market variety. It is of medium size and will prove a ready seller on account of its fine quality and uniform shape. 20c. per oz.; ¼ lb., 60c.; \$2.25 lb.

New Beet, "Michell's Ideal"

CHICORY OR WITLOOF

This delicious vegetable is becoming more popular each year. The roots are easily produced from seed, sown in May or June. They are taken up and wintered over, heeled in soil, or otherwise cared for in a frost-proof cellar. It is used only as a winter vegetable, the top part only being edible. While best results are obtained from planting the roots under a bench in the greenhouse, nevertheless a light, dry, warm portion of a cellar will serve the same purpose. Prepare a bed of rich garden soil, about 12 inches deep. They should be placed about 6 inches apart each way. The top growth remains intact and may be cut any time after they have about 5 inches growth, before the heads begin to expand. Roots should be set in the ground the same depth as they were originally in the garden. A continuous supply of this delicious winter vegetable can be had from December 1st to April 1st. A cold frame makes also an ideal place for forcing them in.

Strong Roots, until stock is exhausted, usually April 1st. 60c. per doz.; per 100, \$4.00; \$30.00 per 1000.

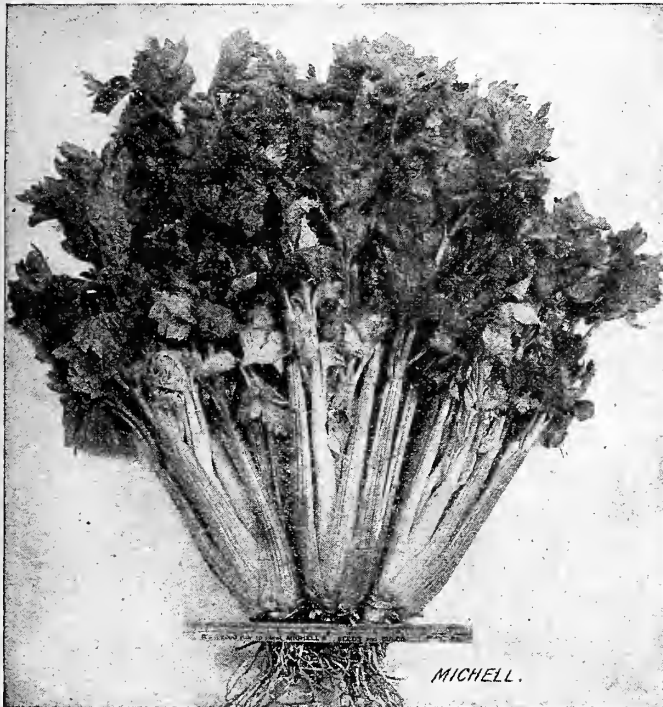

CAULIFLOWER, Michell's Snowstorm

Cauliflower is an important crop with the market gardener and on that account we are extremely critical about the quality of the seed.

Michell's Snowstorm produces colossal heads of the purest white, averaging often 10 inches in diameter, particularly desirable for its extreme earliness; may be used either under glass or outdoors. This cauliflower seed we sell to the most critical market gardeners who refuse to use any other. (Large pkt., 20c.). Trade pkt., 40c.; \$1.25 per ¼ oz.; oz., \$4.00; \$14.00 per ¼ lb.

Celery—Easy Blanching

CELERY—"Easy Blanching"

This variety, without exception, is probably the most important Celery introduction in recent years. The bunch, shown above, was grown from our seed by a market gardener in Collingdale, Delaware Co., Pa., and sent to us October 2, 1917, at which time the three stalks weighed 13½ lbs. and measured 18 inches through in breadth and 18 inches tall. This is a remarkable growth, although its entire planting averages the same. It can easily be figured, that the plants attain an enormous size, considering that they had fully 30 days more, in which to grow. The outer stalks are green, while the inner ones are white, with yellow leaf tips. A valuable variety for use prior to Thanksgiving day. It has sweet, nutty flavor and is neither stringy nor pithy. Every grower of celery should include this in his list. Price, 40c. oz.; ¼ lb., \$1.50; \$5.00 per lb.

PE-TSAI (Chinese or Celery Cabbage)

The American gardener as well as housewife will hesitate, in thinking, that anything of Chinese origin would be suited to their taste. This, however, is not the case with the Chinese Cabbage. The plant is of upright growth, about 15 inches, sometimes more, sometimes less, soil conditions governing. It resembles in appearance and growth a head of Cos Romaine or Celery Lettuce, but possesses the attractive curly feature of Silesian Lettuce, and a broad, wide rib. The heads are very firm, almost like Cabbage. The flavor is delightful, not at all like Cabbage, but rather on the order of Witloof Chicory or French Endive. It may be served like lettuce, tasting better with salad dressing, or it makes excellent Cole Slaw when it is prepared exactly as one would prepare Cole Slaw from Cabbage. It may also be cooked as one would Cabbage, the flavor somewhat resembling Cauliflower. It can be planted as a spring or autumn crop; for latter the seed is sown in July. The head does not become as high then as when sown in spring, and is adapted in that season rather as a Lettuce than as Cabbage. May be forced readily in cold frame. We are convinced that this vegetable will become popular very shortly. The small plants are handled much like Lettuce, except that they should be set out from 15 to 18 inches apart, the rows 2 to 2½ feet apart. They prefer naturally low or moist garden soil, although they will thrive in almost any soil conditions. Oz., 20c.; ¼ lb., 70c.; \$2.50 per lb.

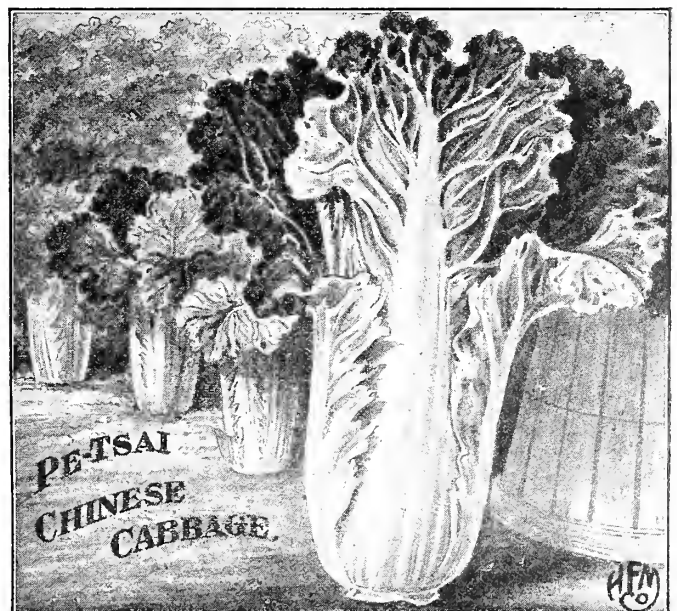

Lettuce, "Davey's" Big Boston

LETTUCE

"Davey's Improved Strain of Big Boston"

This seed is produced for us in a suburb of Paris, France, by one of the leading market gardeners there, who created a heavy demand for this variety. The strain is superior in every way to the usual strain of the Big Boston variety. The heads are larger, almost twice the size, more solid and of better flavor. The outer leaves of the head are large and somewhat loosely set around a solid, buttery, well flavored heart or interior. We have sold this variety extensively to our market gardener customers and many of them have booked their order in advance for this season's supply, in event of a crop failure. It is ideal for hotbed culture in the early spring and autumn, while for summer growing it is one of the best. 25c. per oz.; per ¼ lb., 90c.; \$3.00 per lb.

Honey Dew Muskmelon

MELON or CANTALOUPE "HONEY DEW"

The original seed of this came from Africa; was planted in Rockyford, Colorado, and crossed with the famous Rockyford Melon. It was offered extensively in the Philadelphia markets as late as November during the past year and brought big prices. It might easily be termed a family melon because one is large enough for a number of people. It is large in size, being six inches in diameter and from seven to eight inches long. The skin is smooth with an occasional net, is creamy when white. The thick flesh is emerald green, melting and of a wonderfully delicious flavor sweet as honey. The ripe melons can be kept in a suitable place for several weeks before using. In fact, they can be placed in cool storage and kept until Christmas. 15c. $\frac{1}{2}$ oz.; oz., 25c.; $\frac{1}{4}$ lb., 90c.; \$3.25 per lb.

PEPPER—Pimiento

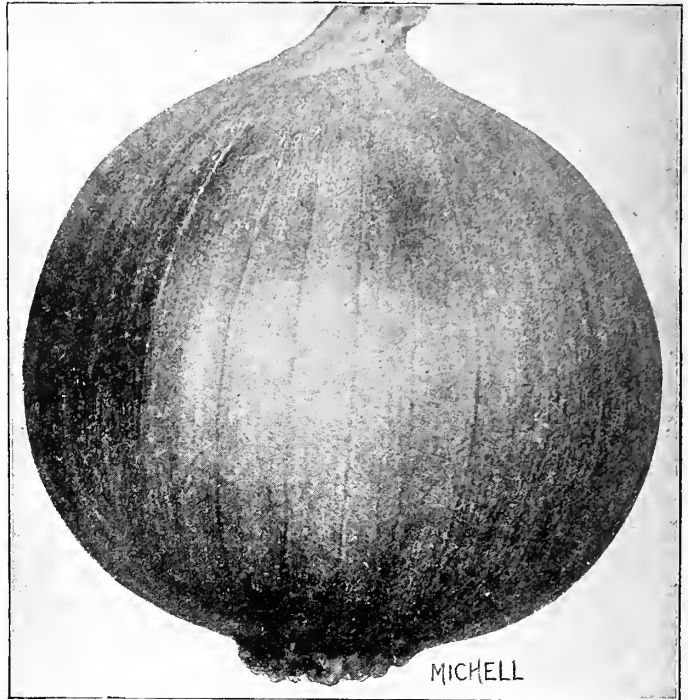

A sweet species without any trace of burning when eaten alone or used in the preparation of other dishes. The plant is compact and uniform in growth, while the fruits are perfectly smooth and attractive. When fully ripe they are bright red, although they can be used in the green state. For slicing on tomatoes, salads, etc., they are delicious; while, used stuffed and baked, they are equally pleasing. This may be considered one of the best peppers for the home garden. 25c. per $\frac{1}{2}$ oz.; per oz., 50c.; \$1.75 per $\frac{1}{4}$ lb.

One of the Many Unsolicited Testimonials

Oak Lane, Philadelphia, Pa.

I should like to take this opportunity of expressing my pleasure in the results obtained from everything I obtained from you. One more thing—I do wish to commend the courtesy of your salesmen, who, in the heaviest spring rush, paid as much attention to the smallest order as if they had been great ones.

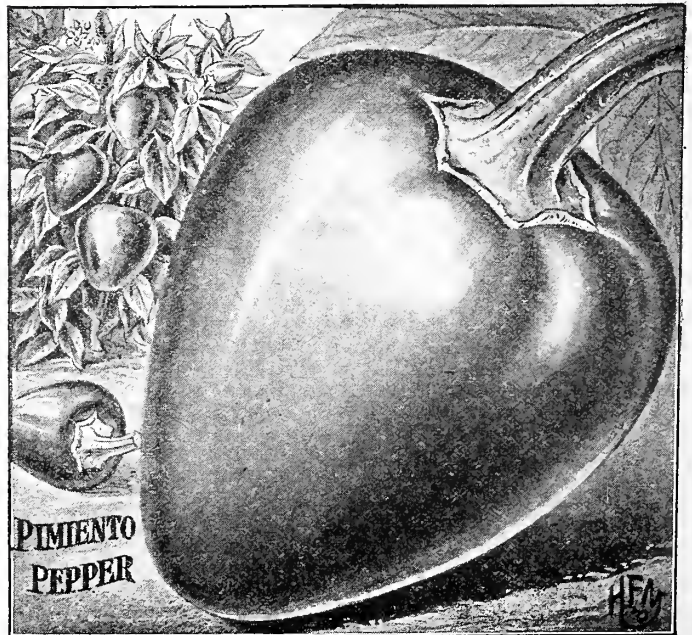

(Signed) IRENE S. ELDRIDGE.

Onion, Winter Keeper

ONION—Winter Keeper

This is a splendid yellow variety, originated in California. Its keeping qualities are really marvelous, lasting in perfect condition well into early summer. It came under our observation for two seasons and each time we were favorably impressed with its good qualities. It can be grown from seed to a full size onion in one season, if sown early and thinned out. It is rather mild in flavor and has a beautiful deep yellow color. Price, oz., 50c.; $\frac{1}{4}$ lb., \$1.50; \$5.00 lb.

MICHELL'S "DISTINCTIVE" VEGETABLE SEEDS

Grown Especially for Market Gardeners' Trade. All prices subject to change.

The trucker and commercial grower is realizing more than ever that he must be extremely careful in the selection of seeds, not only for the purpose of procuring carefully grown strains, but also that the variety he chooses is that which is the most salable in his market. Both of these features have been given our utmost attention in the make-up of our list, and market gardeners can absolutely rely upon "Michell's Seeds." Varieties especially suited to the market gardener and trucker are marked with an asterisk (*).

Beans (Crop Very Short, Order Early)

Varieties Marked * Especially Suited to Market Gardeners' Needs

Information about Dwarf Wax and Green-Podded Beans and Pole Beans (not Limas).

Again must the American Seed Trade report what is probably the most discouraging crop failure of dwarf green and wax podded beans and pole string beans. In many instances bean growers on contract did not get back as much as one-half of the seed they actually planted. There will not be sufficient dwarf green and wax podded and pole beans again this season to supply the demand. We have a normal stock, and hope to be able to take care of our customer's wants in this line. However, owing to the great scarcity, we recommend that all seed orders be placed early. On account of the short crop we quote here prices for quart lots only. Prices for larger quantity on application. Prices subject to change.

MICHELL'S SUGAR CORN

(Connecticut Grown)

Very Short Crop—Order Early

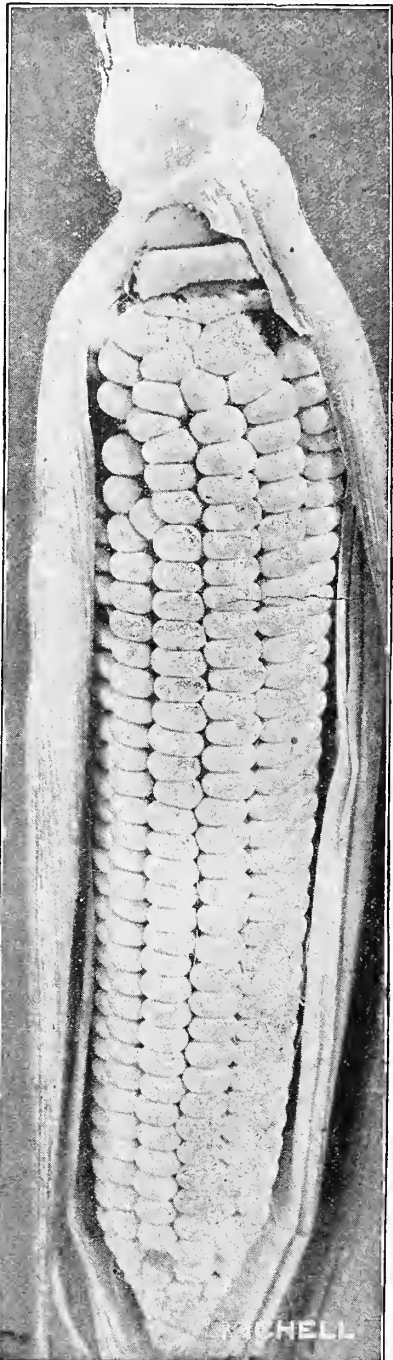

Varieties Marked * are Especially Suited for Market Gardeners' Use.

NOTE—Explanation of Crop Shortage.
The supply of sugar corn for seed is alarmingly short, due to the continuous drought, and the early frosts in the growing districts, the former prevented rapid growth and ear formation, while the latter caught the crop with the grains still in the milk in many kinds. At the time of going to press with this catalog no definite estimate of the harvest could be made. We expect a generous delivery from our respective growers of this crop. We have not priced greater quantities than 1 qt. here, but will be pleased to do so on application.

- Golden Rod.** Similar to Golden Bantam with larger ears and lighter color and not quite so early. Pt., 30c.; 55c. qt.

Brandywine Pure Culture Spawn

This type produces heavy, short-stemmed mushrooms of uniform size. The bricks are inoculated with Pure Spawn culture in the same manner as the "Lambert" strain. Testimonial on Michell's Mushroom Spawn

Last fall I purchased Mushroom Spawn from you and the results are simply wonderful. The beds were one solid mass of mushrooms, and they were the curiosity of the town, as people came from all over to see them.

TESTIMONIALS

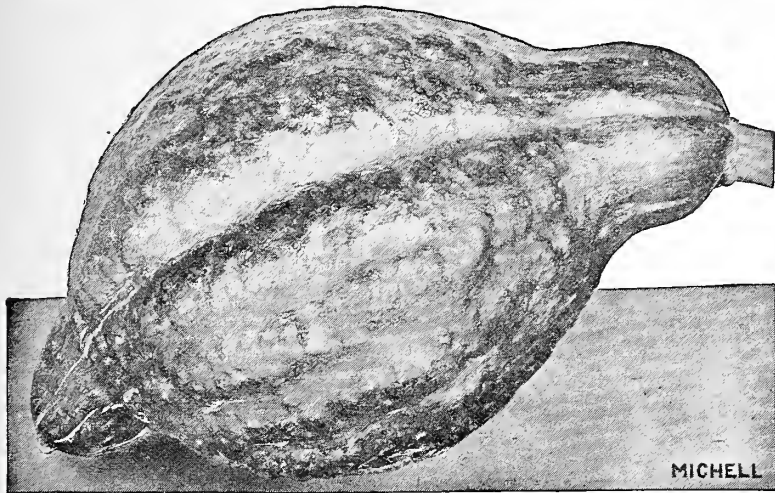

Yorktown Heights, N. Y.
 Michell's **Ideal Beet** did splendidly for me this season. It surpasses its parents, **Detroit** and **Gregory's Eclipse**. **Ideal Beet** will without a doubt be speedily recognized as a standard variety.

Golden Hubbard Squash

SPINACH

Bloomsdale Round-Seeded Savoy (*Improved Strain*). The hardiest Savoy leaved variety; curled and crimped, thick, fleshy leaves; the best for early spring and fall sowing. 15c. oz.; ¼ lb., 55c.; \$2.00 lb.

Long Season. A cross between the old reliable Bloomsdale and the Victoria. It produces tremendously large plants and leaves which are strong and robust. It will resist heat better without shooting to seed than any variety yet introduced. The leaves are somewhat curled, and are tender. Color, a beautiful dark green. 15c. oz.; ¼ lb., 55c.; \$2.00 lb.

New Zealand. This variety endures heat and drought; excellent for summer use; the leaves are small and thick. It is an enormous yielder; growing upright, one sowing can be picked from the entire summer, a very distinct variety. This variety is not used much by market gardeners, but if once introduced by them would find a ready sale; it insures a supply of spinach all season regardless of heat. Oz., 15c.; 55c. per ¼ lb.; lb., \$2.00.

SPECIAL NOTE REGARDS SPINACH PRICES

The district in Europe from whence most spinach seed is received has again forbidden its export except in limited quantity, and even at that abnormal prices are ruling, due to the high price the seedsman must pay to get his supply. Price for larger lots than offered here will be quoted on application.

SWISS CHARD

To our knowledge market gardeners as a rule do not grow this, and yet we find that among our general customers there is a great demand for it. It can be cut all summer, as it does not go to seed.

Michell's Recleaned Grass Seeds (for all purposes)

Our connections with the best grass seed producers in America and Europe place us in a position of advantage for our supplies, chiefly because of the great volume of grass seeds we contract for. Some people have an idea that price is the only factor to consider in grass seed buying; while this has its place, it should be an afterthought. "Quality is paramount." We are always pleased to submit samples with prices for comparison, and let you be the judge. "Our prices and quality are right."

Grass Seed is easily the most important item on a fairway or putting green, and our house realizing this, for a number of years has made a specialty of catering to the grass seed wants of particular clubs.

The bulbs should be started in damp moss, somewhat like Begonias, with plenty of bottom heat and an occasional dampening.

Do not allow them to get chilled, and at all times grow them in a warm, shaded place.

TESTIMONIAL ON MICHELL'S DAHLIAS

Bridgeport, Pa.

I have bought Dahlias from you for several seasons, and this year they are even better than ever. I think this is remarkable, as on account of the unusually dry weather, Dahlias have not done well generally. My plants have all grown splendidly, and are full of flowers, a majority of them of unusual size.

Very truly yours,

(Signed) S. W. S.

Our experience with gladiolus is that the demand seems to be constantly on the increase; it is a crop that can be produced at small expense, either under glass or outdoors. We recommend strongly that every florist grow a quantity of them to supply the demand that will exist again this season. Varieties marked * are splendid for forcing under glass.

Michell's Pot Grown Roses

Extra Strong 2-year-old stock in 5 and 6-inch pots, according to variety.

NOTE.—Please read. Our rose plants are field grown stock, potted during December and January and stored cool, so that top growth is retarded, and root action only is developed. This makes the best kind of a plant for setting out in the spring. Florists should please keep in mind that this stock for the most part is almost dormant until May 1st, and is therefore not suitable for selling in bloom on Decoration Day; each year many florists overlook this and are disappointed when the plants arrive not in bloom. We do not sell forced rose plants.

Regarding Rose Prices.—12 or more plants in the aggregate will be charged at the quoted hundred rate for the respective varieties, where less than 12 are ordered at a time the single or each price will apply.

Time of Shipment.—We prefer to begin rose shipments the latter part of April, in fact from May 1st on is better. Orders will be executed at that time unless advised to the contrary or unless in our judgment weather conditions warrant earlier shipments. No order for plants that aggregates less than \$1.00 will be filled at wholesale catalogue rates. Such orders will be filled and charged at retail catalogue rates, **less 10 per cent.**

Partial View of Michell's Plant Establishment, Andalusia, Pa.

Every florist who has ground around his establishment should plant some varieties of Perennials, especially those kinds which furnish bloom in summer for design and bouquet work.

Michell's Publication—Hardy Perennials and How to Grow Them

An interesting book will be mailed free to applicants. While compiled primarily for the amateur, it makes interesting reading for the experienced florist.

SPECIAL NOTE.—No order for plants that does not aggregate \$1.00 or more will be filled at wholesale prices; such will be charged at retail prices less 10 per cent.

It is not at all surprising that these grand old-fashioned garden flowers are to-day enjoying the greatest popularity; because there is not a time during the spring, summer and autumn in which some hardy perennial is not in bloom. During the past season we have added considerably to our list of varieties, and omitted some which were superseded by better sorts. The soil in our nurseries is especially adapted for producing this class of stock. Give us a trial order in this line, and we feel sure that you will be pleased.

MICHELL'S HARDY CHRYSANTHEMUMS

59

"THE QUEEN OF AUTUMN FLOWERS"

We make a specialty of these, our collection consisting of the very best sorts

No class of flowering perennials adds such a wealth of color and bloom in autumn to the garden as these. The plants are literally covered with flowers from the middle of September till the snow buries them.

EARLY FLOWERING VARIETIES. In front of varieties of this class we have prefixed the letter (E), and probably should state here that these are not dependably hardy in our climate, even though protected when left outdoors in the winter.

Those who are not yet acquainted with this type of Chrysanthemum, on seeing them for the first time, will realize at once their wondrous beauty and free-flowering qualities. Although they are principally cultivated as an outdoor plant, they respond wonderfully when grown inside.

They are chiefly conspicuous by the fact that some varieties commence to bloom as early as August and continue in flower until cut down by severe frost. The blooms of most kinds measure as much as $3\frac{1}{2}$ to 4 inches across, and if disbudded form handsome specimen blooms on long stems, admirably adapted for decorative purposes. We predict that when these become better known they will entirely supersede the smaller type of hardy "mums" now in general use.

SUGGESTION.—While generally conceded to be hardy, we recommend a slight protection of long straw manure over the roots of all hardy Chrysanthemums during the winter months, or, better yet, after they have finished blooming cut the plants down, lift them and place in a cool cellar (light and airy) or in a cool frame and set out in the spring.

Aaron. Bronze Scarlet with bright yellow centre; single.

(E)—**Almirante** (*New*). Orange buff at base of petals; shading to primrose yellow at edge of petals; a large, fine flower which, when disbudded, is often 6 inches across.

Baldwin's Scarlet. As the name implies, this is the nearest approach to scarlet in color that has so far been produced.

(E)—**Blanche Neige** (*New*). Pure white, a splendid flower; excellent for cutting; greatly recommended; September-October; $2\frac{1}{2}$ feet.

Bronze Source d'Or. One of the so-called decorative varieties. Larger than the Pompon type, is excellent for cutting in sprays or for growing pots. Color, a deep golden bronze.

(E)—**Champagne.** Rich, ruby red; of wonderful free-flowering habit. It is among the later varieties, starting to flower early in October and lasting until mowed down by frost.

(E)—**Chatillon** (*New*). Citron-yellow with a slight reddish tinge, which gives the flower a charming appearance. Very vigorous grower. September-October.

(E)—**Cranfordia.** We can strongly recommend this variety for cutting. It is perfect in flower, stem and foliage. Very free flowering; color lemon yellow.

(E)—**Cranford's Pink.** An exquisite shade of mallow pink. The plant has a stiff branching habit. When cut in long sprays, it is a wonderful sight. Early October.

(E)—**Cranford's Yellow** (*New*). A magnificent golden yellow; flowering in October; a strong flower and very free.

Delicata. Large flowered, free bloomer, cameo pink.

Elva. The most beautiful of white Pompons, pure in color and of full, fluffy form.

(E)—**Ethel Blades.** A distinct shade of chestnut red, in fact the color is so unique that it is difficult to appreciate, unless one actually sees it in bloom.

Excelsior. Large flower, bright orange yellow, long stems.

Eleganta. Deep pink, shaded white, medium size flowers; medium height, early flowering.

Fairy Queen. Clear pink in color with nicely formed flowers; medium size. A very fine mid-season variety.

(E)—**Goachers Crimson.** This variety grows about $2\frac{1}{2}$ feet high. When disbudded, the rich crimson blooms are often 5 inches in diameter. It begins to bloom early in September.

Golden Climax. Orange yellow. The finest of the many yellows, possessing every necessary qualification. Blooms November 10th to 20th; very free and long stem.

Golden Harvest. A medium-sized variety of the button type. Deep golden yellow with a tinge of bronze, a color which, when finished, is very pleasing.

Golden West. A duplicate of the yellow baby, except it is twice as large. Rather compact in growth, but an excellent variety for pot plants.

Irene. Pure white, shaded flesh, dwarf grower, very free and early bloomer, also excellent for pot plants.

Iva. Small flowers of deep bronze, mid-season. One of the freest flowering varieties we have.

Julia Lagravere. Crimson maroon in color, and very late; best variety in its color; produces fine sprays for cutting.

(E)—**La Garance** (*New*). Reddish salmon, tinted old rose; very free, large flowering; 2 feet; September-October.

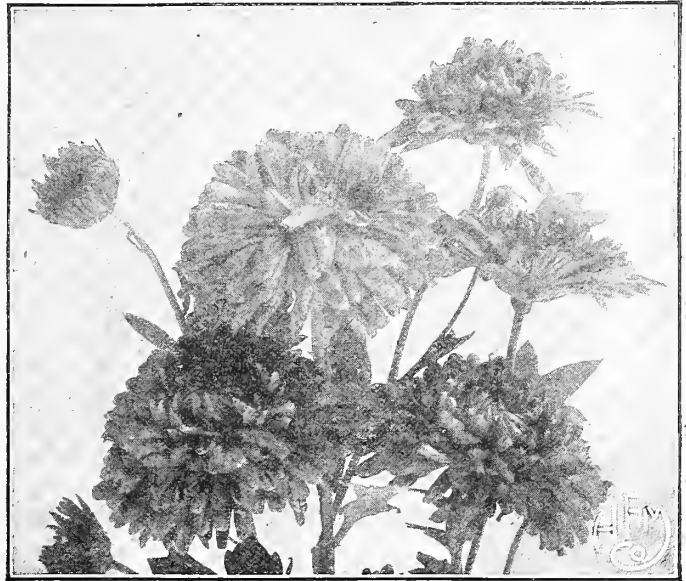

Leota. Delicate pink with bright rose reverse which gives the effective bright centre in each bloom if cut a few days before fully developed; dwarf habit.

Lillia. Tall, stiff stems, good size flowers, freely produced, deep red in color, excellent for cut sprays.

Lillian Doty. The finest pink in the large-flower section of the entire Pompon family. The plant is a tremendous grower, producing beautiful sprays of clear light pink flowers.

Lyndhurst. Small flowers, very deep red, mid-season; a splendid outdoor variety in its color.

(E)—**Marie Dufour.** Grows one foot high; is absolutely snow-white in color. The showiest variety for use as a border and makes an ideal pot plant.

Cranford's Pink

(E)—**Martin Reed** (*New*). Pure yellow sport from Perle Chatillonaise. The best early flowering yellow yet offered; single flower.

Miss Mary Pope. Pale pink, very large single flowers, one of the best.

Mrs. W. E. Buckingham. In color a brilliant shade of rose pink, a vigorous grower; single flower.

Nesco. Old rose in color, maturing about October 20th. Flower of button type. As a producer, Nesco has shown it is one of the best.

Nippon. This Pompon makes an ideal pot plant, being short-jointed and bushy in growth, forms a perfect plant with practically no pinching. Color, flesh-white, with light yellow centre. Also one of the best outdoor varieties. Season of flowering first week in November.

Nordi. A pure white Pompon, maturing November 10th to Thanksgiving. Seven to eight medium-sized flowers to the spray with strong wiry stems.

(E)—**Normandie.** Delicate pink of a lovely shade. One of the earliest, beginning in August and lasting well into October.

Orange Pet. Pretty shade of orange terra-cotta; flowering the early part of October.

Overbrook. Very free flowering; golden yellow; button type; early.

Pink Beauty. Rose pink flowers of medium size.

(E)—**Provence.** Beautiful rose color, with a golden centre, forming a large imbricated bloom; of splendid branching habit and a vigorous grower; September-October; $2\frac{1}{2}$ feet.

Michell's Gorgeous Hardy Delphiniums

AN IMPORTANT SUMMER CUT FLOWER WITH THE PROGRESSIVE FLORIST

Every florist who has a hardy garden or an unoccupied space in the flower garden should plant some Delphiniums. The wonderful display they make through the entire summer, until frost checks them, is hard to describe; in fact, it must be seen to be appreciated. Hardy Larkspurs play an important part in all perennial plantings. In order to keep Larkspurs in bloom continuously during the summer, cut the old flower stems off, after they have faded, and new shoots will produce flower heads successfully. To get the best out of hardy Larkspurs in the way of flowers, feed them occasionally during the growing season with an application of ground bone.

Bella Donna. The freest and most continuous blooming of all. The clear turquoise-blue flowers are not surpassed by any other variety. Doz., \$1.75; \$12.50 per 100.

Belladonna Semi-Plena. The finest of all light blue Larkspurs. The majestic spikes are covered with flowers of gigantic size, the latter appearing in several rows on the stem. 20c. each; doz., \$2.00; \$15.00 per 100.

Capri. The origin of this variety is from the same source as the wonderful sort Moerheimi, to which it is an elegant companion. The immense sky blue flowers are a rich attraction. It is a free and continuous bloomer. Extra strong plants. Doz., \$3.00; \$22.50 per 100.

Chinense Album. Same as below in white. Doz., \$1.25; \$8.00 per 100.

Chinense Azureum. Plants grow but 2 feet tall, branch freely, each branch terminating with a loose spray of single flowers; color, a deep clear blue. Doz., \$1.25; \$8.00 per 100.

Formosum. Dark blue, white centre, spikes 3 to 4 feet tall, vigorous; free blooming. Doz., \$1.25; \$8.00 per 100.

Formosum Coelestinum. Most beautiful heavenly blue, immense flowers. Doz., \$1.25; \$8.00 per 100.

Hugo Poortman (New). Enormous semi-double flowers of a beautiful pale blue color. 35c. each; doz., \$3.50.

Johannesburg Semi-double; delicate sky-blue with rose sheen; tall growing; free bloomer. 35c. each; doz., \$3.50.

King of Delphiniums. Remarkably strong, vigorous plants with flowers of gigantic size, semi-double, deep blue with white eye. 35c. each; doz., \$3.50.

K. Th. Caron. Bright gentian blue, with white centre; the white eye is very prominent and distinct. \$2.50 doz.; per 100, \$20.00.

La Martine. The single, dark blue flowers are densely arranged on tall, erect stems. It is one of the most decorative of the hardy Larkspur. Doz., \$2.00; \$14.00 per 100.

Lilacina. Splendid variety; rosy lilac, with white centre. 35c. each; doz., \$3.50.

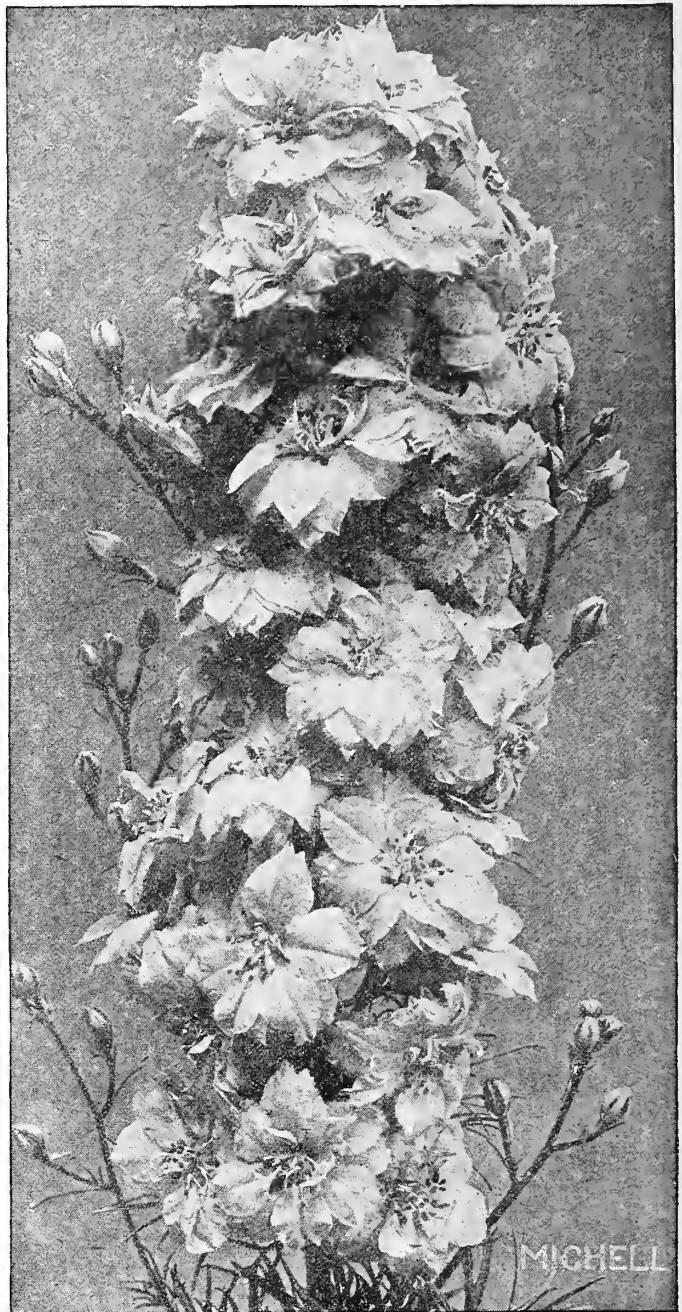

Lizzie. Fine, tall, well-branched; spikes of single flowers, often 2 inches across; color azure blue, with a distinct yellow eye. Doz., \$2.50; \$20.00 per 100.

Moerheimi. The only real pure white hardy Larkspur. It grows 3 to 4 feet high, and flowers continuously from June until autumn, and produces more spikes on a single plant than any other variety. The side stems themselves are often over two feet long. These qualities make it one of the best varieties for cutting. The flowers are of the purest white. 25c. each; doz., \$2.50; \$17.50 per 100.

Mrs. Thompson. Deep blue flowers, each with a large, white eye. It blooms with wonderful freedom and produces spikes of medium length, with dense flower heads. 25c. each; doz., \$2.50; \$14.00 per 100.

Nassau. The flower heads appear all season uninterruptedly, the individual single blooms are very large, often 2 inches across; the shade is a clear heavenly blue. The plant grows frequently 4½ to 5 feet high and is very stately. 25c. each; doz., \$2.75; \$20.00 per 100.

Persimmon. Of handsome form, with strong, erect spikes of large, single flowers of a lovely sky blue shade, with a creamy white eye; a real improvement on Belladonna. Doz., \$2.50; \$20.00 per 100.

Delphinium "King of Delphiniums"

Queen Wilhelmina. A variety of great merit and a recent introduction. The gigantic flower spikes are laden with light lavender-blue flowers, which are shaded rose. A distinct white eye in each floret sets it off wonderfully. 25c. each; doz., \$2.50; \$20.00 per 100.

Theodora. The flower is a real azure blue; the individual blossoms are loosely arranged on tall, erect spikes; a very fine variety. On account of its distinct shade of blue it will be appreciated by all who are fond of hardy Larkspurs. 20c. each; doz., \$2.00; \$14.00 per 100.

Gold Medal Hybrids, Mixed. No finer strain has ever been produced; the plants we offer are a re-selection from a choice collection. Doz., \$1.50; \$10.00 per 100.

Michell's Superb Hybrids. These are the cream of seedlings from a famous strain of English varieties, comprising all the shades of blue. \$2.00 doz.; per 100, \$15.00.

MICHELL'S GORGEOUS PAEONY ROOTS

We send out extra strong Paeony roots

Paeonies are rapidly coming to the foreground and are now considered by the florists an indispensable cut flower. A collection of Paeonies constitutes a most valuable asset, steadily increasing in value from year to year. Paeonies as cut flowers, always demand a good price and yield a very profitable income from the investment. For home and table decorations they are exceedingly effective, and last in water longer than most other flowers. For social functions, weddings and church decorations there is nothing more suitable. Festiva Maxima and Officinalis types are usually ready in the latitude of Philadelphia by Decoration Day. The flowering period of others is carried through the month of June. Paeonies require, after planting, practically no attention except a top dressing of well-rotted manure in the late autumn.

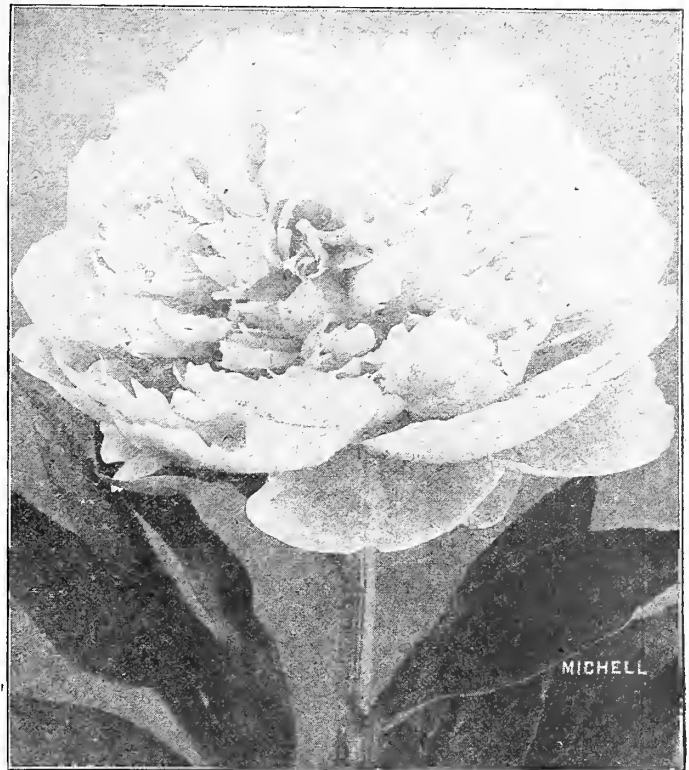

Be Progressive; Plant Paeonies.

CULTURAL NOTE ON PAEONIES

Autumn or during April is one of the best times for planting. The soil should be well enriched with well-rotted manure. The roots should be set about 3 feet apart in rows, the latter 4 feet apart, to enable them to be cultivated with horse machines. The crowns should not be set more than 4 inches below the top of the soil; deeper planting may mean fewer flowers, sometimes none. Cultivate them freely, prior to and after the flowering season.

Our stock of these is unusually fine. We have endeavored to embrace in our list the very best sorts. A visit to our nurseries in September and October presents a marvelous sight in beauty and color.

- No. 2F. For one heavy horse or two light horses, wood beam. 12.50
- No. 3A. 2-horse, wood beam. 16.25

The prices above are for plain plows with clevis only. Jointers and wheels can be supplied for Nos. 2, 3 and 4.

No. 1007 E. L. 7-TOOTH IRON AGE CULTIVATOR

By means of the lever wheel the depth may be regulated with a single stroke of the arm; the expanding lever renders it able to go through very narrow rows successfully. The cultivator may also be used as a five-tooth machine by merely unbolting two teeth and arms. Price, \$11.00.

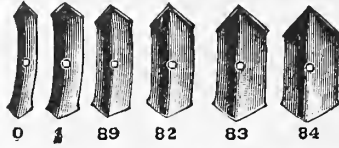

We can also supply all other styles of Iron Age Horse Cultivators.

No. 8 PLANET JR. HORSE HOE AND CULTIVATOR

Made of steel throughout. The lever wheel and depth regulator enable the operator to increase or lessen the depth of tilling by the mere stroke of the arm. The side or covering steels and shovel which is in the rear may be taken off and the arms so turned that when the extra teeth, which accompany the machine, are attached, it presents a perfect five-toothed cultivator. Price, with cast wheel as above, \$16.50.

We can also supply all other styles of Planet, Jr., Horse Cultivators.

THE KIRKE SYSTEM

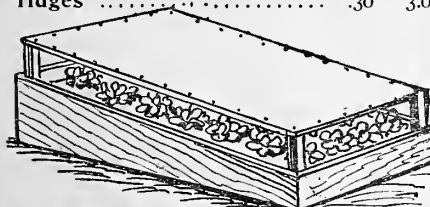

Of applying **INSECTICIDES, FUNGICIDES, FERTILIZERS** and **SALT** to plants

Showing how the Kirke Fertilizer and Insecticide Cartridge holder is attached to the spigot.

This system consists of a nickel-plated receptacle generally called the cartridge holder. This is equipped with a reservoir into which can be put a cartridge of insecticide and fungicide, or one of fertilizer as the occasion requires. The cartridge holder may be attached to the end of the hose followed by the nozzle or it may be attached directly to the spigot and followed by the hose. The cartridges are very hard in substance, highly concentrated and only a small amount is required to show results. As the water passes through the cartridge holder into which a fertilizer or insecticide cartridge has been placed the requisite amount of either material placed therein is carried through by the water pressure and applied to plants. Practical gardeners claim this to be one of the best means of applying insecticides and fertilizers. It requires about 5 hours to dissolve one of the cartridges, so it will be seen that the method is economical.

HYDROCYANIC—ACID GAS—FUMIGATION WITH CYANEGG as given to us by a practical gardener. Very poisonous to human beings and animals. Put four ounces of water in a galvanized iron pail, add to this two ounces of Sulphuric Acid, wrap an ounce of Cyanegg in paper and place it in the bucket which should be placed near the door of the greenhouse to afford quick exit; the moment the Cyanide strikes the liquid it generates a poisonous gas which must not be inhaled. The above charge is sufficient for 1,000 cubic feet of space. Don't open the greenhouse for at least 12 hours. One of the ventilating escape entirely before entering. This is claimed to be the only and best remedy to absolutely kill the white fly. It is claimed that it will not injure the most delicate plant if used according to directions, but the user should take good care of himself. **Cyanegg**, 65c. lb.; 5 lbs. for \$2.75. We do not supply Sulphuric Acid, as this can best be procured locally.

Michell's Keystone Plant Tubs

Plants, large or small, appear always to better advantage when planted in tubs instead of pots. They are easier handled because they are much lighter in weight; they are more attractive and bring a higher price. Tubs have welded hoops, except bottom hoop, which is flat (and neat handled, when desired, at extra prices, as mentioned below). Unlike pots, they do not break, nor do they require special packing when used in shipping. Made of white cedar, they are by far the *cheapest, neatest, lightest and best* florist tub put on the market.
